The IT ACT 2000

Section 30 - Certifying Authority to follow certain procedures

Every Certifying Authority shall, (a) make use of hardware, software and procedures that are secure from intrusion and misuse; (b) provide a reasonable level of reliability in its services which are reasonably suited to the performance of intended functions; (c) adhere to security procedures to ensure that the secrecy and privacy of the digital signatures are assured; and (d) observe such other standards as may be specified by regulations.
