Seeds Rules, 1968

Rule 37 - RULE 37: RETAINING OF THE SAMPLE

-The sample of any seed shall, under Cl. (c) of sub-section (2) of Section 15, be retained under a cool, dry environment to eliminate the loss of viability and insect proof or rat proof container. The containers shall be dusted with suitable insecticides and the storage room fumigated to avoid infestation of samples by insects. The sample shall be packed in good quality containers of uniform shape and size before storage.
